FRONT LINE

General Staff, as of 08:00 on 21 Sep: 238 combat clashes, up from 211 the previous day. Heaviest fighting on the Kostiantynivka axis (24) and Pokrovsk (19), then Lyman (15), South Slobozhanshchyna (7), Kupiansk (6), North Slobozhanshchyna and Kursk (6), Sloviansk (5), Huliaipole (2), Orikhiv (2).

Russian fires over the same period: 91 airstrikes, 295 guided bombs, 10,237 kamikaze drones, 2,903 shellings including 35 MLRS salvoes. Claimed Russian losses: 1,660 personnel, 3 air defence systems.

ISW (20 Sep assessment): no confirmed advances by either side. Ukraine's 3rd Army Corps reports liberating Shandryholove, Derylove and Drobysheve northwest of Lyman under the second phase of Operation Vivaldi.

^{20,10,21}

UKRAINIAN LONG-RANGE STRIKES

The headline event sits just before the window: the night of 19 to 20 Sep, final day of Duma voting, Ukraine's largest-ever attack on Moscow. Russian MoD claims 1,110 fixed-wing drones downed across about 20 regions, Crimea and the Black Sea; Sobyenin claims 450 downed en route to Moscow. Confirmed: the Moscow Oil Refinery damaged and burning. Moscow region governor Vorobyov: 2 killed, about 20 injured (CNN reports 3 killed).

Zelensky confirmed strikes on a major oil facility and a logistics site in Moscow region. Zelensky's weapons list included the Pelican ballistic missile alongside Flamingo cruise missiles and multiple drone types; Kyiv Post notes Pelican's stated range makes a direct Moscow hit improbable, so its role is unclear. The General Staff also reports hits on a Buk-M3 and a Nebo-U radar.

For the night of 20 to 21 Sep, no Russian MoD intercept claim or General Staff-confirmed strike was found at cut-off. ^{22,23,24,25,39}

NAVAL PICTURE

No Ukrainian Navy ship count for 21 Sep was available in English at cut-off.

Standing picture (Navy spokesman Pletenchuk, 14 Sep): for a fourth month Russia launches Kalibrs from inside harbours rather than putting carriers to sea. Up to four potential carriers in theatre (2 Buyan-M corvettes, 2 Varshavyanka submarines), realistically two active surface vessels. Two Kalibr launches so far in September. ²⁶

Method. Compiled from Ukrainian official statements (Air Force, General Staff, oblast administrations, Ukrzaliznytsia, Ukrenergo) as carried by Ukrainian and international outlets, plus ISW. Russian MoD claims are marked as claims. Casualty figures are the latest available at cut-off and usually rise. Threat level is an editorial call built on four inputs: overnight munitions count, regions hit, civilian casualties, and transport or energy disruption.
